Sontheim

Your heart beats for computer science - join our team!

Sontheim is a leading system provider from the Allgäu region for automation, diagnostics and connectivity solutions. The range of services includes the development and production of innovative hardware and software systems. For mobile machines, we are one of the big players in the development and series production of diagnostic and connectivity systems.
We aim to further expand our market leadership with forward-looking technologies.

Within the scope of our product developments we are looking for motivated university graduates (m/f/d) with immediate effect:

Entry in the area of our embedded software development

Your area of responsibility:

- Active participation in the area of our embedded software developments
- Hardware-related software development in the areas of Linux kernel, U-Boot and microcontrollers
- Further development and maintenance of our existing systems
- Test and documentation of the software

Your profile:

- Completed studies in computer science, electrical engineering, mechanical engineering or a comparable degree
- Interest and passion in programming, ideally knowledge of the programming language C/C++
- Basic understanding of software and hardware infrastructures
- Ability to work in a team, to communicate and to solve problems
- Independent and structured way of working

This is what you can expect from us:

- The stable environment of an established medium-sized company paired with the charm of a young team
- The opportunity to develop in a future-proof and exciting subject area
- Working with large and well-known manufacturers from the commercial vehicle or mechanical engineering sector
- A team leader who always has an open ear for questions, progress and discussions
- Working where others go on vacation. Kempten - the capital of the Allgäu region
